The Ultimate Sound Quality Loudspeaker

The **E6 6.5 component system** was designed and developed from the best of DB Drive's technologies. With engineering standards taken from the most prestigious home hi-fi speakers. The E6 is a true purpose built hi-fi loud speaker system for your car. The success of the E6, is that it is built completely from the ground up. The E6 is composed of a composite coned mid-bass driver developed for the sole purpose of extreme transparent audio reproduction. The E6 30mm silk dome tweeter with rear resonance chamber technology is designed for the extremely low distortion and crystal clear reproduction.

The E6 component system goes way beyond the reasonable expectations of a conventions component system and offers unparalleled acoustical efficiency. Built for your car with no restraints demanding music lover!
